

Exte Neo XT

- ✓ box shape – rectangular
- ✓ box made of polystyrene
- ✓ max. recommended box width: 4500 mm
- ✓ armour type: PVC or aluminium filled with PUR
- ✓ inspection hatch from the bottom or inside
- ✓ PVC or aluminium guides
- ✓ allows the integration of a mosquito net

The Exte Neo XT top-mounted roller shutter is the so-called polystyrene system, which means that it is characterized by good parameters in terms of acoustic and thermal insulation. It is available in two revision versions – with a hatch from the bottom or from the inside – and with 9 different variants of boxes for the investor's convenience.

Installation is extremely simple. The universal system of adapters **allows you to attach the roller shutter elements to any type of window, and the top-mounted box locks in the right position with a loud click.**

Exte Neo XT can be equipped with an integrated mosquito net with a minimum width of 700 mm and a maximum height of 2400 mm. Thanks to the use of a special reinforcing rail, **it is possible to create stable roller shutters with a width of up to 4.5 m.**

TOP-MOUNTED SHUTTERS
