Chambers

The MB-45 system is intended only for the production of internal elements - windows, cash boxes, vestibules, shopwindows, doors, partition walls. MB-45 can be used to build exterior carpentry, but only in the case of elements that do not require thermal insulation parameters. Only and exclusively for Poland with the B marking – it is not intended for Europe!

*The above value of U_w is given for a reference window with dimensions of 1230 x 1480 mm, in the best thermal variant.
