

Panorama

- ✓ profile with the construction depth of 74.5 mm
- ✓ glazing with glass units form 16 to 50 mm
- ✓ system with a thermal break
- ✓ we lacquer in the full RAL K7 colour palette and, on request, in other colours (use powder code)

1.2

Uw when Ug = 0.6
(Aluminum spacer)

3

Chambers

A technologically advanced system designed for the production of folding doors. The system is made of thermally insulated aluminum sections, which makes the Panorama system a very good thermal insulator.

Uw = 1.2 W/(m²K)* when using the 4th / 16Ar / 4 / 16Ar / 4th package – Ug = 0.6 W/(m²K), argon-filled, with aluminum frame.

*Coefficient calculated for a door with dimensions of 4000 x 2200 mm.
