- ✓ net: fibreglass / PVC (standard)
- ✓ width: from 30 to 130 cm
- ✓ height: from 50 to 250 cm
- ✓ single-action opening
- ✓ aluminium-reinforced structure
- ✓ specialised nets available
- ✓ profiles painted in all RAL colours
- ✓ the mosquito net consists of the sash with three hinges

The single-action SALOON hinged mosquito net is distinguished by its smooth profile, which is rounded on the outside. The product is rigid and resistant. These qualities are provided by aluminium protective plates and internal corners reinforcing the structure.

The mosquito net can be equipped with a specialised net, such as an anti-allergy net or an anti-smog net, which allows even car fumes to be blocked.

The profiles and netting can be painted in any RAL colour.
